

LIFECYCLE SERVICES

ABS is committed to supporting our clients throughout the entire lifecycle of their network. We understand that your needs are just as multidimensional as your network.

From network design to equipment reaching its end-of-life, ABS is there every step of the way.

KNOWLEDGE IS POWER.

By supporting the entire lifecycle and having intimate knowledge of your network, ABS can smoothly deploy new equipment and reduce overall downtime, saving you time and money. Our engineers and support staff will collaborate and share information on the back-end to ensure the highest level of service and support is provided to our clients at all times.

YOUR NETWORK | UNDERSTOOD

Your network is unique, having a partner that truly understands it is invaluable. When everyone is on the same page, services such as network design and project management hand-off prove to be a breeze.

YOUR NETWORK | FULLY SUPPORTED

Leveraging ABS' maintenance contract management services provides more than just an organized and well-managed maintenance contract; it can also lead to minimized downtime. Contracts managed by ABS are automatically visible to our Support Engineers which comes in handy during troubleshooting situations. That shared information between our teams allows ABS Support Engineers to quickly understand exactly which devices on your network are covered and which ones are not which; this ultimately leads to faster decision making resulting in reduced downtime.

PROJECT + DELIVERY MANAGEMENT

With certified Project Management Professionals on staff, our team works to ensure that projects are completed on-budget, on-time, and within the agreed-upon scope. Project Managers will initiate and plan your project, lead our team of engineering professionals through design, staging and implementation of the project, monitor and control the project from start to finish, and bring your project to complete closure to include documentation and quality assurance.

CONSULTING SERVICES

ABS is ready to guide and develop solutions for clients to meet their business objectives. We'll take a deep dive to assess your network, design a solution and even go the extra mile by creating road maps to help clients reach success.

LEASING + FINANCING OPTIONS

ABS understands every client has unique financial circumstances. Sometimes, technology investments simply make more sense when financed via an operational budget instead of through a capital expenditure budget. To make procurement painless, ABS partners with financial institutions to ensure purchases and payments can be made on your terms.

RESIDENCY + STAFF AUGMENTATION

We could all use an extra hand now and then. ABS is committed to providing highly qualified engineers for clients in need.

SUPPORT SERVICES

The ABS Managed Service offering provides experienced Solutions Engineers to proactively monitor, manage, maintain, and support your entire infrastructure for one predictable monthly cost.

MAINTENANCE CONTRACT MGMNT.

ABS has an expert understanding of the various maintenance levels for multiple manufacturers. Our team will help with quoting, contract renewals, contract management, and associating contracts with your manufacturer IDs.
