

SECURITY

Safely connect users and guest devices to your network, protect your investments and minimize risk to your business with a solid data protection plan. Additionally, provide the ultimate form of security for your employees and customers with an indoor and outdoor physical security solution.

When it comes to protecting what's most important, ABS has you covered.

NETWORK SECURITY

DATA PROTECTION

PHYSICAL SECURITY

OUR SECURITY EXPERTS ARE READY TO HELP.

Unfortunately, new types of threats crop up every single day. Our expert team of technicians and engineers stay abreast of all industry trends and technology improvements to ensure that our clients remain safe. ABS will take a close look at your environment to assess what is needed to keep you secure. Whether it's touring your site to determine proper camera placement, road mapping a data protection plan, or helping clients to understand where they are at risk, rest assured that you are in safe hands.

SECURELY CONNECT YOUR USERS + GUESTS

We will help you to provide secure wired and wireless access, regardless of device, to securely connect users and guests to your network. ABS Technology will help you control and monitor the content on your network, protect against day-zero attacks, and reduce unwanted emails that drain storage resources.

IT'S YOUR DATA | LET'S KEEP IT THAT WAY

Protect your investment and minimize the risk to your business with a solid data protection strategy. Our solutions enable the seamless recovery of your systems due to machine, environment, or site failure. ABS experts will help you craft a solution which is easy to test and manage, ensuring the integrity of your data and the continuity of your business operations.

SECURE YOUR ENVIRONMENT + YOUR ASSETS

Secure your environment, receive incident alerts and protect your employees, students, and investments through a robust physical security solution. Our team will survey your site to determine proper equipment placement and certify full functionality to protect your investment.
