

With the continued growth of streaming applications and cloud-based services, the costs of enterprise level WAN infrastructures have skyrocketed. The cost to connect, maintain and support these infrastructures has continued to increase as well. While enterprise WAN environments are still appropriate in many cases, the latest Meraki SD-WAN technology is now enabling organizations to do more with less in vendor agnostic environments.

MANAGE MORE END USERS FOR LESS WITHOUT SACRIFICING SECURITY

INCREASES DATA EFFICIENCY

LOWERS OPERATIONAL COSTS

ENABLES HIGHER RESILIENCY + BUSINESS CONTINUITY

MERAKI SD-WAN ENABLES:

- Intelligent path control
- Policy-based routing
- Circuit load balancing
- Application optimization through QOS + bandwidth management
- Dual uplinks
- Automatic failover
- Secure connectivity through AES encryption
- Secure connection to remote sites through VPN + low cost internet circuits

ABS MANAGED SERVICES FOR MERAKI SD-WAN:

The ABS Managed Services Team provides experienced Solutions Engineers to proactively monitor, manage, maintain and support your entire IT infrastructure for a predictable, monthly cost.

- Monitoring of SD-WAN traffic
- Quarterly site visits + hardware inspections
- Biweekly + monthly reporting
